

# FileBound Mobile... Improves the way you work!

Today's work environments demand and expect instant access to documents and information in the office or on the go. FileBound Mobile meets this challenge by providing secure access to critical documents and allows the processing of workflow assignments from any device from anywhere.

The FileBound intelligent interface is designed to automatically recognize the device you are using and provides an optimized view for that device. FileBound also converts documents like Microsoft Word to image formats allowing them to be viewed without installing the native software that supports them.

FileBound instantly connects you with the documents and work assignments you need to get more work done whether you're in the office or not. To learn more about how FileBound Mobile can optimize your operations, contact us today.
