

**USE THE POWER OF THE WEB TO
MANAGE YOUR BUSINESS EQUIPMENT**

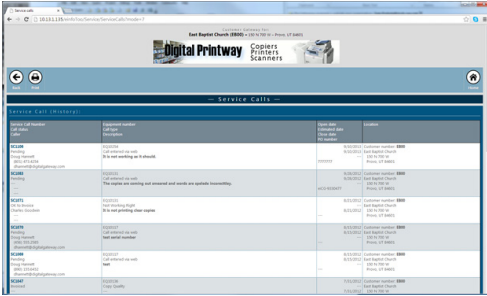

E-info is an e-commerce Web portal dealers can use to exchange information found in e-automate with your customers. With it, your customers can better manage their business equipment.

Customers can log in to a dedicated and secure website where they can perform the following activities:

- Order supplies and check order status
- Input meter readings and view meter history
- Initiate service requests
- Monitor account information
- View account summary information

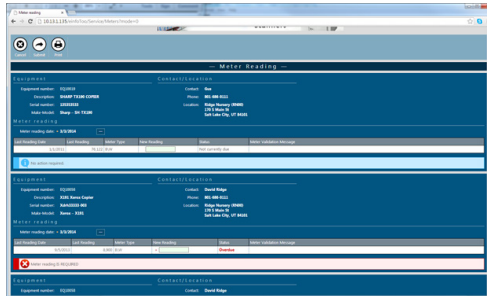

Enable your customers to manage their business equipment on the Web. Call us to learn more about e-info and what it can do for your business.
